Before the invention of OBD 2 resetting your check engine light was a simple matter of disconnecting your battery. OBD II was deployed in 1996. So if your vehicle is newer than that I do not recommend that you disconnect the battery to reset the check engine light. First of all remember if you have a hard failure the light will come right back on.

Peterbilt with a Cat 15 check engine light flashing while driving. Help!? Any help would be appreciated. All I really know is what the summary above says. I heard there is a way to pull the code using the cruise controls, but I'm not sure how to do it. It would also be helpful if I could find where to diagnose the code once I have it.

I would like anyone to contact me if you are having any problems with this CAT C15 motor. I bought a new 2006 Pete last year in March and I have been having a problem with this engine since I hit about 95,000 miles (2 months ago) This truck has been to 3 different shops, and all three shops know that the truck is missing but can't seem to find the problem.
