The usual tool in mathematics to do so is the notion of a set. Any collection of things, called elements, is a set. The deck of cards is a set, whose elements are the cards. The participants of the party form a set, whose elements are Alice, Bob, Carl, Diane, Eve, Frank and George (let us denote this set by P).

Discrete mathematics is the study of mathematical structures that are fundamentally discrete rather than continuous. In contrast to real numbers that have the property of varying "smoothly", the objects studied in discrete mathematics - such as integers , graphs , and statements in logic [1] - do not vary smoothly in this way, but have distinct, separated values.
