Ap Transpiration Lab Answers

Transpiration Introduction Most of the water a plant absorbs is not used for a plant's daily functioning. It is instead lost through transpiration, the evaporation of water through the leaf surface and stomata, and through guttation, which is the loss of water from the vascular tissues in the margins of leaves. ... Transpiration Lab The Variables:
Independent Variable: The light, what is being changed. Dependent Variable: The plant, what is changing due to the independent variable. By Brittany Carter and Hart Evans Procedure: Results Four pansies were obtained and then de flowered. The root

Lab 9 Transpiration & by Merissa Ludwig - BIOLOGY JUNCTION

In the first section of this laboratory you will investigate factors that influence the rate of transpiration. In the second section you will study plant anatomy as it relates to transport. To do this laboratory, you should understand the basic concepts of water potential. You can review these by looking back at Lab 1. Diffusion and Osmosis.

AP Biology: Lab 9: Transpiration | AP Central - The ...

This lab strongly relates to the major theme of AP biology of evolution. When plants shifted from living in an aquatic environment to living on a terrestrial environment it was a large evolutionary shift. Because of the shift from water to land, the plants had to overcome many challenges to survive.
