An Introduction to Basic Statistics and Probability

14 Chapter 1 Axioms of Probability. is equal to the sum of the proportion of times that A_1 occurs and the proportion of times that A_2 occurs. For example, for the experiment of tossing a fair die, $S = \{1, 2, 3, 4, 5, 6\}$ is the sample space. Let A_1 be the event that the outcome is 6, and A_2 be the event that the outcome is odd.
