A single day on the Moon lasts the equivalent of 29.5 Earth days, which is the result of its tidally-locked orbit with Earth, and Earth's orbit around the Sun.

Which Countries Have Been On the Moon? - WorldAtlas

"Whitey on the Moon" is a 1970 spoken word poem by Gil Scott-Heron. It was released as the ninth track on Scott-Heron's debut album *Small Talk at 125th and Lenox*. It tells of medical debt and poverty experienced during the Apollo Moon landings. The poem critiques the resources spent on the space program while Black Americans were experiencing marginalization.

Moon Facts - Interesting Facts about the Earth's Moon

The closest look we've had at the moon came from the launch of NASA's Apollo program in the 1960s. Between 1967 and 1972, a series of missions landed the first men on the moon. Equipped with handheld cameras, Apollo astronauts documented their journey, capturing photos of the moon and its rocky terrain through surveys conducted from lunar orbit and on the ground.

Google Moon

The Moon (or Luna) is the Earth's only natural satellite and was formed 4.6 billion years ago around some 30–50 million years after the formation of the solar system. The Moon is in synchronous rotation with Earth meaning the same side is always facing the Earth. The first uncrewed mission to the Moon was in 1959 by the Soviet Lunar Program with the first crewed landing being Apollo 11 in 1969.
