Opel Cam-in-head engine — *Wikipedia Republished // WIKI 2*

Manta Engine Tuning. The Cam-in-head CIH engine can still be tuned up. My old Exclusive GTE had a modified CIH engine with the old Vauxhall Carlton stainless 2.2 crank & con-rods, bigger exhaust and inlet valves, a 'fly-cut' compression ring cylinder head from Oselli Engineering, with a one-off Kent Cam, K&N air filter (panel style) and Jetex exhaust system.

Opel Cih Engine

The Opel cam-in-head engine (CIH) is a series of inline engines built by former General Motors subsidiary Opel from 1965 until 1995. Both four- and six-cylinder configurations were produced. The name derives from the location of the camshaft, which was neither cam-in-block nor a true overhead camshaft. In the CIH engine the camshaft is located in the cylinder head but sits alongside the valves rather than above them.

OPEL 2.4 L CIH 16v Dyno run

Is there anyone else using a 2400 cih engine for his racecar? I have one in my Manta and it is already pretty fast, but i like to keep developing this old cast-iron dinosaur, as i'm still running ...

Tech Tip: Tuning the 1.9 Liter Opel Engine FREE ONLINE ...

The CIH engine was obviously an easier sell to Opel's corporate overlords at GM, reusing as it did much existing pushrod valve gear while still offering some of the benefits of a true OHC engine. The valvetrain is more compact than in a pushrod engine and its associated inertia is much less, allowing a redline north of 10,000 rpm for race-prepped CIH engines with roller rockers and suitable springs and cam profile.

The Opel Cam-In-Head engine ("CIH" for short) is a series of inline engines which was built from 1965 until 1995 and was available in four- or six-cylinder configurations. Its name derives from the location of the camshaft , which was a compromise between an overhead valve and an overhead cam layout.
