## ~~Overview | Architecture | Azure Red Hat OpenShift Latest~~

OpenShift is a family of containerization software developed by Red Hat. Its flagship product is the OpenShift Container Platform—an on-premises platform as a service built around Docker containers orchestrated and managed by Kubernetes on a foundation of Red Hat Enterprise Linux. The family's other products provide this platform through different environments: OKD serves as the community ...

## ~~Red Hat OpenShift~~

Red Hat OpenShift is a Kubernetes distribution focused on developer experience and application security that's platform agnostic. OpenShift helps you develop and deploy applications to one or more hosts. These can be public facing web applications, or backend applications, including micro services ...

## ~~Disaster Recovery Strategies for Red Hat OpenShift — Red ...~~

Red Hat OpenShift 4 offers self-service environments across an app's life cycle, so developers have a consistent foundation for the code that will make a difference. Deploy a unified experience, anywhere. Modern applications need resources from multiple infrastructures. Red Hat OpenShift 4 includes centralized management and visualization ...

## ~~Red Hat OpenShift Administration I (DO280)~~

Red Hat OpenShift Container Platform comes with a streamlined, automatic install so you can get up and running with Kubernetes as quickly as possible. Once installed, OpenShift Container Platform uses operators for push-button, automatic platform updates for the container host, cluster, and application services running on the cluster.
