PW200 - Pratt & Whitney

Engines | Piaggio Aerospace

The maintenance of the engine that is used in the Airbus H135 and H135M helicopters was carried out in the engine maintenance shop in Stans. The fact that the PW206 engines can now be maintained in-house at RUAG Aviation will help to increase the availability of the Swiss Air Force's helicopter fleet.

New TBO Program for PW206 and PW207 Engines

The PW210 is helping shape a new generation of twin-engine helicopters setting new standards in fuel burn, power-to-weight ratio, environmental emissions and operating economics while maintaining Pratt & Whitney's reputation for high durability and reliability, the hallmarks of dependability.

TYPE-CERTIFICATE DATA SHEET - EASA

Piaggio Aerospace produces a significant percentage of PW206 and PW207 engine components, assembling these parts in the completed engine as well as testing and delivering the product to the final customer. The company is also responsible for the maintenance, repair and overhaul of engines throughout their lifecycle.
