Definition: Meiosis is the process in which one cell undergoes division two times for the production of four cells containing half the original quantity of the genetic information. These newly formed cells are sex cells, that is, eggs in females and sperm in males. It is the method of gamete formation in which a

Different Stages in the Process of Meiosis. Meiosis is a cell division process that occurs in two stages, resulting in the formation of four haploid gametes. The two stages of meiosis are meiosis I and meiosis II. Each stage is further divided into another four phases, details of which we will discuss in this article.
