**What happened to the Subaru Aircraft Engine? - JdFinley.com**

There are two commercial producers of Subaru engine conversions for experimental aircraft. One is Eggenfeller (sp?) and I don't recall the other. Check the EAA website. CAUTION: I would thoroughly investigate all aspects of the conversions before putting my money down and my life on the line.

**Subaru EG33 Conversion - Canard**

The Subaru EA81 was originally designed & developed as an Aircraft Engine and then later modified for Automotive use when Subaru pulled out of the aviation business. The EA81 compact design as well as the low weight/power ratio makes it a highly recommended power plant for the TERRIER 200.

**Subaru Conversion - www.Westy-World.com**

Hall mount installed on Subaru EG33 engine For Subaru EA82 MPFI, EJ22, EJ25 and EG33 engines, we offer a version of our proven F system to control both fuel and ignition functions. These are calibrated in inches of mercury absolute and are suitable for both naturally aspirated and turbocharged engines.

**SDS EM-5: Aircraft**

Welded chrome-moly engine mount system. Fiberglass engine cowl for the Stratus conversion (two-halves, easy removal). This is the same cowl as the Rotax 912 - the cowl must be modified to accommodate the Subaru engine. Warp Drive three-blade, ground-adjustable pitch carbon fiber propeller with spinner.

**Subaru Power! - Zenith Aircraft Company**

Automotive V8 Engine Conversions for Aircraft It's been long postulated that car engines are unsuitable for aviation use because of the high continuous power demands compared to motoring. Is this still true in the days of 1000 Hp Helephant crate engines (7 litre supercharged), V8 Supercar engines that have the majority of components last indefinitely and now 600 Hp 4 litre power units are common.
