The NA TA (one has yet to be released) will be 65bhp so boosting the engine to 85bhp seems reasonable; to 105bhp we are probably still within the rigours of reason. If you look at the A500 where most of the engines are running at 165bhp - 65% up on the NA - this engine seems by all accounts to be a hardy engine.

Twin Air | The Choice of Champions

The twin air should be the base engine on the US 500. It has more power and torque than the non-turbo 1.4, and evidently uses less fuel (unless you fully use that extra power and torque, of course).
