## 5th Grade Science Study Guide Science Process Skills

In this unit, you will develop the essential skills underpinning practical scientific investigations. As well as drawing on Unit 1 and Unit 2, these skills will be delivered through subject themes ranging from enzymes and diffusion to electrical circuits. The subject themes provide different contexts for the development of the investigative skills.

Example of an Investigation Sam sets up an investigation to find out how sunlight affects plant growth. He gives 2 plants the same amount of water each day, but he places one plant in the sunlight, and the other plant in the shade. The plant in the sunshine grows 5 cm taller than the plant in the shade during the 2 weeks of the investigation.
