*TRS 2014 - An Open-source Recipe for ... - Teaching Robotics*

Teaching control in mobile robotics with V-REP and a Khepera IV library Abstract: The advances of information and communication technologies have impacted in control education. Virtual laboratories are increasingly been used to enhance the way that students interact with simulations.

is why robotics is very interesting and versatile from a pedagogical point of view Farias et al. (2015). Robotics is also a vast area, it has a large number of branches. Mobile robotics is the branch that deals with robots that are not physically fixed during their operation. In the literature a mobile robot is defined as: \an

Gisa, and S. D. Levy) SLAM demo (courtesy of Leopoldo Armesto) Adaptive Belief Tree (ABT) algorithm (courtesy of Hanna Kurniawati et al.)

*A Khepera IV library for robotic control education using V-REP*

This paper's motivation is to present a new robotics teaching method: Algorithm, Virtual experiment, Programming and Controller (AVPC), which shows students the steps of complete robot algorithm development, verification, and application process, taking the kinematics of an educational desktop 6-DOF robotic arm as a typical teaching case.

*V-REP and LabVIEW in the Service of Education | SpringerLink*

Let's face it, robots are cool. They're also going to run the world some day, and hopefully, at that time they will take pity on their poor soft fleshy creators (a.k.a. robotics developers) and help us build a space utopia filled with plenty. I'm joking of course, but only sort of.. In my ambition to have some small influence over the matter, I took a course in autonomous robot control ...

*A teaching method for the theory and application of robot ...*

Abstract. The following paper exposes an effective approach of teaching robotics by applying very efficient and popular set of tools. It demonstrates a combination of applications such as V-REP and LabVIEW in order to be later utilized for rapid prototyping, algorithm design and revival of both simple as well as fairly advanced robotic environments.

*Robotics Programming Tutorial: How to Program a Simple ...*

Virtual Robotics Toolkit from Cogmation Robotics is a simulator for LEGO Mindstorms or VEX robots, depending on the chosen version. The product is focused on STEM education and is also useful for teams who want to prepare for robotics competitions. It supports importing 3D models from LEGO Digital Designer or other similar tools while programming the virtual intelligent brick takes place as in ...

*VREP& - teaching-robotics.org*

It introduces you to the world of professional robotics programming! You will learn the tools and services that the ROS ecosystem offers in a structured and power-packed manner. If you master the content presented in this course, there is nothing to stop you from learning to program and use ANY robot that runs the ROS core libraries.

*Vrep Teaching Robotics*

Coppelia Robotics co-organized the tutorial on teaching robotics with a simulator. Autodesk IDEAS (San Francisco, June 25-26 2014) Coppelia Robotics presented and participated in the Autodesk IDEAS innovation and design series on robotics. V-REP Release 3.1.2 is out (June 16th 2014)
