### Web Search Engine Ieee Paper

Abstract: Our paper examined the overlap among results retrieved by three major Web search engines for a large set of more than 10,316 queries. Previous smaller studies have discussed the lack of overlap in results returned by Web search engines for the same queries. Our large-scale study measured the overlap of first page results (both non-sponsored and sponsored) across three major Web ...

Abstract: Search engine is the most important tool to discover the any information in World Wide Web. In a row with the terrific growth numbers of the Web, traditional search engine nowadays is not appropriate anymore to be used. Searched by keyword and do not understand polysemy and synonymy are some reasons the traditional search engine is not suitable anymore.

### Introduction to Semantic Search Engine - IEEE Conference ...

To achieve this goal, this paper suggests combining Deep Web information, which consists of dynamically generated Web pages, which cannot be indexed by the existing automated Web crawlers, with ontologies. Improvements when finding deep Web sites returned by a search engine are assessed based on the framework formulated in this paper.

This paper provides an in-depth description of our large-scale Web search engine to define the values and traditional techniques of data in hypertext. Apart from the problems of scaling traditional search techniques to data of this magnitude, there are new technical challenges involved with using the additional information present in hypertext to produce better search results.
