This section will also show information about whether the function is deprecated, or may be unavailable in future versions. Syntax. Shows the declaration of the function from ...

[Windows API - Wikipedia](#)

Win32 API is a set of functions defined in the Windows OS, in other words it is the Windows API, this is the name given by Microsoft to the core set of application programming interfaces available in the Microsoft Windows operating systems.

[Programming reference for the Win32 API - Win32 apps...](#)

This article provides links to reference documentation for APIs that can be used in desktop Windows apps. Win32 (Windows API) The Win32 API (also called the Windows API) is the native platform for Windows apps. This API is best for desktop apps that require direct access to system features and hardware.

[PyWin32 Documentation](#)

This manual documents the API used by C and C++ programmers who want to write extension modules or embed Python. It is a companion to Extending and Embedding the Python Interpreter, which describes the general principles of extension writing but does not document the API functions in detail. Stable Application Binary Interface

[Why can't I find any pywin32 documentation/resources](#)

To ensure data integrity, be sure to become familiar with DeviceIoControl and how other APIs behave differently with a direct access handle as opposed to a file system handle. The following requirements must be met for such a call to succeed: The caller must have administrative privileges.

[Win32.chm](#)

Sleep function. 12/05/2018; 3 minutes to read; In this article. Suspends the execution of the current thread until the time-out interval elapses. To enter an alertable wait state, use the SleepEx function. Syntax

[API Index - Win32 apps | Microsoft Docs](#)

winapi documentation: Getting started with Win32 API. WinAPI (also known as Win32; officially called the Microsoft Windows API) is an application programming interface written in C by Microsoft to allow access to Windows features.

[Sleep function \(synchapi.h\) - Win32 apps | Microsoft Docs](#)

I cannot find pywin32 documentation or even a little synopsis of what the module is (I am aware its for win32 API stuff). Is there any pywin32 documentation or resources? Maybe some examples?

[Win32 API - Using Function Documentation | winapi Tutorial](#)

Win32 API Utilizing MSDN Documentation. Introduction. The Windows API is vast, and contains a lot of features. The size of the API is such that no one can know all of it. While there are many resources like StackOverflow, there is no substitute for the official documentation. Remarks.

[Python/C API Reference Manual - Python 3.8.1 documentation](#)

The functions of Win16 API mainly reside in the core files of the OS: kernel.exe (or kmi286.exe or kmi386.exe), user.exe and gdi.exe. Despite the file extension of exe, these actually are dynamically linked libraries. Win32 is the 32-bit API for modern versions of Windows. The API consists of functions implemented, as with Win16, in system DLLs.

[Windows API Index - Win32 apps | Microsoft Docs](#)

The Win32 API reference documentation is presented in several different views. You can browse a list of popular technologies on this page, or you can browse the full list of technologies in the table of contents. To browse all of the headers, see the list at the bottom of the table of contents.

[Windows API | Microsoft Wiki | Fandom](#)

The Windows API (Win32) is focused mainly on the programming language C in that its exposed functions and data structures are described in that language in recent versions of its documentation. However, the API may be used by any programming language compiler or assembler able to handle the (well-defined) low-level data structures along with the prescribed calling conventions for calls and callbacks .
